The screenshot shows the Zabbix web interface. At the top, there are input fields for Name (10.0.7.201), DNS, IP, and Port. Below these are buttons for 'Apply' and 'Reset'. A 'Tags' section allows for adding tags with a dropdown menu set to 'Contains'. Below the form is a table with columns: Name, Items, Triggers, Graphs, Discovery, Web, Interface, Proxy, Templates, Status, Availability, Agent encryption, Info, Tags. Two rows are visible in the table:
